Leadership | Change Management | Strategic Thinker | Project Management | Communication | Collaboration | Facilitation | Organization | Problem Resolution | Adaptable | Planning | Performance Optimization | Project Coordination | Scrum | JIRA | Design and Development | Client Relationship Management

9 YEARS SALESFORCE EXPERIENCE

Salesforce Developer/Architect, Capgemini

12/2023 to

Present

Role: Vlocity/Salesforce OmniStudio Developer @ Prudential Life Insurance

- Developed Contact Information Change Omniscripts to save users time in bringing the ability to update a customer's contact information into Salesforce - this triggered an API call to Prudential internal systems for real time synchronization.
- Led design sessions with business analysts and service team leads to translate insurance based requirements into an optimized OmniScript flow, ensuring usability and alignment with enterprise processes.
- Participated in daily scrum meetings, sprint planning, and backlog refinement, providing technical input to prioritize enhancements and deliverables.

Role: Vlocity/OmniStudio Developer @ RLI Specialty Insurance

- Joined a project set to be abandoned after a year of development - resurrected the work and delivered the working product to production in 13 weeks.
- Acted as the bridge between design and development for RLI Insurance's Sales Cloud implementation, translating business requirements for specialty insurance partner sellers into Salesforce solutions, leading design workshops, participating in daily scrum meetings, and coordinating development tasks; drafted stakeholder-facing communications and technical documentation to ensure alignment and accelerate delivery.

Vlocity/OmniStudio Technical Architect, Silverline Inc.

9/2022

to 2/2023

- Played a pivotal role as a bridge between the business and clients, actively participating in proposal development, scoping estimates, and supporting pre-sales initiatives.
- Orchestrated the seamless transformation of business requirements into Salesforce/OmniStudio User Stories, ensuring alignment with project objectives and client goals.
- Took charge of the design, coding, debugging, packaging, and deployment of solutions to the client's Salesforce Org, ensuring the delivery of high-quality and efficient solutions.
- Collaborated closely with stakeholders to discern and comprehend client business needs, translating them into viable and effective technical solutions including ERDs, process diagrams and other artifacts.

Roles: Salesforce Administrator, Salesforce Solution Architect, Product Owner, Program Manager, Epic Owner, Agile Coach

- Oversaw multiple Salesforce Orgs as the primary administrator, ensuring optimal performance, security, and user satisfaction.
- Led enterprise-wide Salesforce implementations across Sales Cloud, Service Cloud, and Salesforce Communities, translating complex business requirements into effective solution designs, Epics, Features and User Stories.
- Spearheaded the transition from Salesforce Classic to Lightning across the Enterprise, enhancing user experience and system efficiency on multiple transformation projects including thousands of users.
- Developed and implemented Salesforce flows and automation to streamline business processes, resulting in increased productivity and reduced manual effort.
- Managed the configuration of Salesforce environments, including custom objects, fields, record types, page layouts, and security settings to align with business needs.
- Collaborated with cross-functional teams to deliver Salesforce solutions, acting as the liaison between business stakeholders, developers, and consultants.
- Designed and implemented a campaign management engine in Salesforce, automating task and call assignment for Small Business call center sales agents.
- Created a market-wide RFQ/RFP process using Salesforce and NLP, improving quoting turnaround times, and fostering cross-team collaboration.
- Developed an order fulfillment process in Salesforce using OmniStudio/Vlocity, significantly reducing medical plan installation turnaround times.
- Actively contributed to the Enterprise Architecture group, focusing on sales and order fulfillment effectiveness.
- Enhanced the Salesforce Community for broker sales agents by designing guided interactions using Salesforce OmniStudio/SFI.
- Utilized Conga Composer and advanced SOQL queries to produce functional documents based on Salesforce data.
- Configured Vlocity Omniscripts, Cards, and Salesforce components for production use and proof-of-concept work.
- Supported a B2B portal using Vlocity/OmniStudio, enabling partner sellers to quote and enroll small business insurance customers through a CPQ framework. *Now called Experience Cloud.*
- Led the Salesforce implementation for tracking telephonic sales to consumers seeking Individual health insurance under the Patient Protection and Affordable Care Act.

CERTIFICATIONS

- SAFe 4 Practitioner Certification – Issued Mar 2019 (*Lapsed 2022*)
- Salesforce Certified Administrator – Issued May 2017 (*Lapsed 2020*)
